

THARUN MEDAM

513-295-9220 | medamtn@mail.uc.edu | Cincinnati, OH | github.com/tharunmedam | linkedin.com/in/tharunmedam

F-1 Student | OPT Eligible (12 months + 24-month STEM Extension)

SUMMARY

AWS Certified Solutions Architect (Associate) and Cloud Practitioner with hands-on experience deploying and managing cloud infrastructure on AWS. MS Computer Science student at University of Cincinnati (GPA 3.8). Skilled in EC2, S3, RDS, VPC, IAM, and CloudWatch with a strong foundation in troubleshooting and supporting cloud environments.

AWS CERTIFICATIONS

AWS Certified Solutions Architect – Associate | AWS Certified Cloud Practitioner | Red Hat Certified Enterprise Application Developer (EX-183)

CLOUD & TECHNICAL SKILLS

AWS Services: EC2, S3, RDS, Lambda, VPC, IAM, CloudFormation, CloudWatch, CloudTrail, SNS, Auto Scaling, ALB, Route 53, CloudFront

Cloud Concepts: High Availability, Fault Tolerance, Disaster Recovery, Cost Optimization, Well-Architected Framework

Scripting & OS: Python (Boto3), Bash, Linux (RHEL), Windows Server

Databases: MySQL, MongoDB, DynamoDB

Tools: AWS CLI, Git, VS Code, IntelliJ

EDUCATION

University of Cincinnati — MS Computer Science

GPA: 3.8 / 4.0

Cincinnati, OH | Aug 2024 – Present

KL University — BTech Computer Science

GPA: 3.7 / 4.0

India | Jul 2020 – Apr 2024

EXPERIENCE

Virtual Visionaries Pvt. Ltd. — IT Venture Lead (Founder)

Jun 2021 – May 2024

- Deployed client web applications on AWS EC2 with VPC, IAM roles, and security groups; configured RDS with Multi-AZ failover ensuring 99.9% uptime.
- Monitored infrastructure using CloudWatch dashboards and alarms; performed root cause analysis, reducing recurring incidents by 40%.
- Managed S3 buckets with versioning and lifecycle policies, cutting storage costs by 30% across client workloads.

PROJECTS

AWS Web App Hosting — Portfolio

d3apdhmkfwcglq.cloudfront.net

EC2 | RDS | S3 | IAM | Security Groups | CloudWatch | CloudFront

- Launched EC2 (Linux) with custom security groups restricting inbound to ports 22 and 80/443; attached IAM role with least-privilege permissions to eliminate hardcoded credentials.
- Connected application to RDS MySQL in a private subnet, restricting DB access exclusively to the EC2 instance via security group rules.
- Served static assets from S3 via CloudFront CDN for global low-latency delivery; configured CloudWatch CPU alarm with SNS alert to simulate production monitoring workflows.

E-Commerce App — AWS Hosted

EC2 | S3 | RDS | CloudFront | IAM | CloudWatch | Python Django

- Deployed full-stack Django app on EC2 within a custom VPC; hosted static assets on S3 with CloudFront CDN, reducing page load times by ~40%.
- Configured RDS MySQL with automated snapshots and IAM instance profiles, eliminating hardcoded credentials and ensuring data durability.
